

IN THE SPECIFICATION:

Please amend the specification by replacing paragraphs as follows:

A. Specification Paragraphs With Mark-ups to Show Changes Made

The following are mark-ups to show changes made at page 8, paragraph [0024]:

a' [0024] The first lens cell has a center point (e.g., CP1) at a point a distance away from a center axis (e.g., CA1) of the first lens cell, and the second lens cell has a center point (e.g., CP2) at a center axis (e.g., CA2) of the second lens cell. That is, the center point of the first lens cell is fixed according to a beam incident point on the first lens cell. In general, the center point of the lens cell can be shifted to a desired point in formation of the lens cell.
